VIT-AP UNIVERSITY

Apply Knowledge. Improve Life!®

Journal Paper and Report writing
(A Value Added Course)

offered by
School of Computer Science and Engineering (SCOPE)

Over the last decade, the expectation for publishing research papers has increased significantly in academia, in professional communities, and in science and technology disciplines worldwide. Research papers add a great value to your resume. Research papers involve a lot of learning. A research paper in your resume shows you're curious and enthusiastic to do something and getting it published in well-known and approved journals or conferences can signify your hard working nature. Graduation with good grades, industry experience, internships can be achieved by many students from a lot of institutions but the question is what you did extra during your BTech/MTech programme. The process of publishing a paper will help inform a future career path and illuminate opportunities. Paper publication is compulsory for a research scholar. The act of putting your research to paper will help you clarify your goals for the research, will help you in reviewing and interpreting your own data and force you to compare your work with that of others.

Course Highlights :-
★ Student will be able to learn Research Paper reading and writing skill
★ Student will be able to write a survey paper
